

# Designing natural gingiva through characterization

Characterization | Hands-on

# Designing natural gingiva through characterization

In this workshop, the individual color design of a denture is demonstrated step by step and worked out in a practical manner. The focus is on the analysis of the different gingival layers and their specific color system. These are demonstrated and practiced with the preset CANDULOR colors 53, 55, 57 and the AESTHETIC Intensive Colors.

## Learning objectives

- › Learning and enhancing the color characterization of the gingiva.

## Recommended experience

- › Advanced 3–5 Jahre
- › Expert >5 years

## Format

- › Presence or in-house

## Category

- › Workshop

## Duration

1 Day

If you have any questions about our training courses or an individual in-house offer, please contact us at:
